I am delighted to welcome you to *Infectious Diseases and Therapy*. Launched in January 2012, the journal focuses on the exciting but challenging times within the infectious diseases therapeutic area. The international, peer-reviewed journal publishes concise and high-quality papers in all areas of infectious diseases, including but not limited to, microbiology, epidemiology, virology, sexually transmitted diseases, pandemics and epidemics, new and emerging infections, chronic infections, vaccines, drug-resistant pathogens, tropical diseases, and all other infection-related problems that clinicians and researchers face on a daily basis.

The journal publishes all types of research, from preclinical through to post-marketing and observational studies, diagnostic, pharmacoeconomic, public health, educational, and quality of life studies as well as case reports, concise reviews and brief reports. It can also publish supplements and special issues, either based around a collection of articles on the same topic, or on sponsored meeting proceedings, roundtable discussions, case series, or similar.

*Infectious Diseases and Therapy* is an open access journal, allowing widespread dissemination of information, which is additionally enhanced by a number of features that appear online alongside the papers. All articles also have a freely accessible bulleted summary slide, displaying the key points of the paper, to encourage readership to a broader audience and enhance the educational value of the paper. Other optional enhanced features include slide decks, animations, videos and interactive quizzes, all of which are peer reviewed and open access. To meet the ever-growing demand to publish research quickly, *Infectious Diseases and Therapy* is a rapid publication journal, with a peer review decision reached within 2 weeks from

submission, and acceptance to online publication within 3–4 weeks.

The journal's primary focus is to provide up-to-date, high-quality and relevant information by the most effective and educational methods for infectious diseases clinicians, researchers and the pharmaceutical industry. I look forward to driving the success of this journal forwards and believe that the journal will be a welcome and valued addition to the world of infectious diseases.
